

## REMARKS

This preliminary amendment is being filed to provide headings and an abstract, to correct obvious errors in the specification, to correct an obvious error in Fig. 3 and to conform the claims to conventional format.

At page 17, line 36, it is obvious from the context that the specific examples given relate back to the previous paragraph concerning the description of monomer D, and not to component C.

Likewise, at page 21, line 17, it is obvious that the chemical name for TEMPO is 2,2,6,6-tetramethyl-1-piperidinyloxy, and that the expression "pyrrolidinyloxy" is an error.

Figure 3, on the other hand, is described at page 28, lines 33-34 as illustrating a PSA coated directly onto a paper support. It is obvious that the PSA coating is missing from the bottom sheet. This is corrected in the enclosed corrected drawing.

No new matter is presented.

Favorable action is respectfully solicited.

Respectfully submitted,  
NORRIS, McLAUGHLIN & MARCUS P.A.
